

The diagram illustrates the three main components of the system:

- Battery Voltage Sense:** A circuit diagram showing a voltage divider connected to a microcontroller. The divider consists of a 10k resistor and a 1k resistor. The microcontroller pin is labeled SENSE_VBAT.
- Board Version Selection:** A circuit diagram showing a voltage divider connected to a microcontroller. The divider consists of a 10k resistor and a 1k resistor. The microcontroller pin is labeled BOARD_VERSION.
- Auxiliary Ports:** A diagram showing a microcontroller connected to a set of pins labeled AUX_0 through AUX_7.
